

## NANT Board of Directors

## About NANT

NANT promotes education and advances the professional role of the technician as an **important** member of the multidisciplinary team in delivering the highest quality of care to the chronic kidney disease (CKD) patient. It provides educational opportunities and access to contact hours 24/7, encourages the development of nephrology professionals in leadership roles, and achieves recognition for the contribution of the nephrology technology practitioners to the total care of the CKD patient.

Visit our [STORE](#) for materials to prepare for certification, earn contact hours for recertification, and the latest water treatment and dialysis technology education

  - All Basic member benefits
  - Free Contact Hours
  - Qualify for Conference Scholarships
  - Vote for NANT Leadership
  - Become a NANT Leader

## What our members say about DTX - the ONLY conference FOR technicians BY technicians

I really enjoyed this opportunity to learn more about the advances in the dialysis field.

The Patient Point of View session brought tears to my ears, so often the family/caregivers are dismissed or not even seen and this session opened my eyes TREMENDOUSLY

Dialysis is changing with a new generation of people. DTX gave me insights about how I can climb my career ladder.

I took this information back to my ICU Director. Very helpful!
